Experience

Shophero - Product Engineering Manager

May 2021 - Present

- Spearheading a cross-functional team comprising front-end developers, designers, and product managers to deliver exceptional user experiences.
- Actively contributing to the development of various products by leveraging a robust tech stack, including Nuxt 3 (Vue), TypeScript, Tailwind, and tRPC, while providing strategic art direction and product guidance.

MTC - Software Engineer

Jun. 2019 - May 2021

- Collaborated within an Agile team to develop web and mobile features for a language learning application, utilizing Angular for seamless user experiences.
- Championed the re-architecture of our CSS framework by incorporating BEM methodology, effectively streamlining communication and collaboration between the Front-End and Design teams.
- Orchestrated the optimization of our CI/CD pipeline by employing Fastlane and CircleCI, accelerating the build process through automation and scripting, ultimately reducing build times by 40%.

Shophero - Software Engineer

Oct. 2017 - Jun. 2019

- Redesigned the core product UI to enhance accessibility and user-friendliness, resulting in an improved customer experience..
- Crafted a modular e-commerce application leveraging the power of Vue and Nuxt for seamless functionality and adaptability.
